**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 10, 31-34, 40, 41 are rejected on the ground of nonstatutory

double patenting over claims 1, 10 of U. S. Patent No. 7,154,966 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the claimed subject matter claimed in the claims 10, 31-34, 40, 41 requires knowledge of history estimation, which is

Art Unit: 2611

essentially obtained from the average information in that of claims 1, 10 of Patent No. 7,154,966.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claims 10, 30** are rejected under 35 U.S.C. 102(e) as being anticipated by Dorney et al. (US 6,789,225) (hereafter Dorney).

**Regarding claim 10**, Dorney discloses the claimed subject matter “determining a decision boundary for a respective channelization code using the received symbols and at least one decision boundary estimate determined for another channelization code” in Fig. 3, element 300; col. 1, lines 44-51; col. 3, lines 25-50; Fig. 4, col. 3, line 60 to col. 4, line 38; wherein when the received data is estimated utilizing the metric determined from previous symbols in element 300 of Fig. 3.

Art Unit: 2611

**Regarding claim 30**, Dorney further discloses the claimed subject matter “wherein the soft bit value estimates are determined using received symbols and at least one decision boundary estimate determined for another channelization code” in Fig. 3, element 300; col. 1, lines 44-51; col. 3, lines 25-50; Fig. 4, col. 3, line 60 to col. 4, line 38.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claims 40-41** are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorney.

**Regarding claim 40**, see claim 10 above. Further, utilizing “computer program” for performing such claimed subject matter would have been easily realized by one skilled in the art since it would be much easier for implementation and updating.

**Regarding claim 41**, see claim 30 above.

***Allowable Subject Matter***

7. Claims 1-9 are allowed.

Art Unit: 2611

8. Claims 11-29, 35-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
